Abstract of the Disclosure

The Examiner has reminded Applicants of the proper content of an Abstract of the Disclosure and asserts that revision of the Abstract to include the structure of compounds is required. Accordingly, Applicants submit herein an amended Abstract of the Disclosure, which includes reference to the structure of the compounds and the nature of their use. With this amendment, Applicants submit that the abstract is now proper.

35 U.S.C. 103(a)

The Examiner has rejected claims 1-12 under 35 U.S.C. 103(a) as being unpatentable over Ito et al. U.S. 5,095,022 ("Ito"). The Examiner has objected to claims 13-17 as being dependent upon a rejected base claim but has indicated that they "would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims" and that "the substitution of the alkylene spacer by cyclic substituent or heteroatom has

not been disclosed or fairly suggested by the art of the record” (Office Action page 3, paragraph 4).

Claims 7-12 have been canceled, therefore the rejection is no longer applicable to these claims. Applicants have amended claim 1 herein to require that the alkylene spacer is substituted by a heteroatom or cyclic substituent. Ito does not teach or suggest such compounds. Therefore, the rejection is moot and should be withdrawn.

Claims 13-17 were objected to as being dependent upon rejected base claims. The amendments presented herein obviate the rejections of the base claims. Therefore, the objections are rendered moot and should be withdrawn.

New claims 18-20 specify that the alkylene spacer is substituted with a cyclic substituent, *e.g.*, a cyclopropyl group. Applicants believe these claims are allowable.
